Hi Rob

I cannot seem to comment on the website - does this mean that comments are closed for this application?

As a full member of the Music Producers Guild and a client of Air Studios I must object to this application because I am very concerned that the noise of the building works will force the studio to close.

Air operates to the highest professional standards and that means when we record music we hear only the music not the noise of heavy plant and excavations

I am very concerned that the studios may be forced to close during these works which means not only will we be able to record during that time but also the business may not survive an extended period of closure.

Hampstead needs Air Studios!

Please reject the application

Thank you
