2015/0544/P	Grace Weinstein	38 Frognal Flat 5 Hampstead London Nw3 6AG	02/06/2015 05:27:43	OBJ	<p>No other late-night venues in this area. It would create an isolated late-night nuisance; it is not located in an area with other similar facilities and would create problems for policing.</p> <p>Introduction of new late-night use in a primarily residential neighbourhood, with associated risks for crime, anti social behaviour and noise, preventing local residents from the peaceful enjoyment of their nearby residences.</p> <p>Entrance queuing, which is proposed outside the 300-club capacity, would cause additional noise and late night disturbance in the local area. This nuisance has not been present earlier.</p> <p>The pavement is narrow in and traffic moves quickly along Finchley Road, meaning the venue is poorly situated for the entrance and exit of hundreds of guests, as proposed.</p> <p>Camden's Environment Department raised concerns over the safety of the venue to accommodate a capacity of 300</p> <p>The approval of a nightclub, which is isolated from any late night public transport options and where there are no hotels or other supporting facilities, would introduce additional vehicular traffic and parking. The area is primarily residential and not well suited to late night commercial traffic flows.</p> <p>The additional would also cause severe disturbance to nearby residential streets.</p>

2015/0544/P	Vicky Barnecutt	6B New End London NW3 1DD	29/05/2015 09:20:07	COMMNT	I object to the increase in capacity for this venue as this will significantly increase late-night foot traffic in the are and potentially anti-social behaviour. I question whether police resources should be stretched to cover this extra activity.
