

01 Waterproofing Membrane - Detail A

03 Example of Application of Newton 500 waterproofing system

02 Waterproofing - Detail B

The Newton System 500 waterproofing system is designed and installed by a Newton Specialist Basement Contractorwith Newton 508 Mesh chosen as the waterproofing membrane. The use of Newton 508 Mesh meant that costly and damaging surface preparation is not required. If required, the system can be removed to restore the vaults to their original condition in accordance with Listed Building requirements.

Key project factors

- Listed building
- Original features retained
- Newton 508 Mesh fitted to follow curvature of arches
- Quick application

Products used:

- Newton 508 Mesh
- Newton NuSeal Plugs

For installation specifications and further informations, please refer to the pdf document included in this application *Newton 508 Mesh_Datasheet*
