Subject: APPLICATION REF 2015/2787/P - 1 BRIDGE APPROACH, LONDON, NW1 8BD

ATTN: James Clark

We are writing in connection with the above mentioned application, as we are one of the companies located at Iron Bridge House, the premises which are located behind the property in question.

We object to the application due to the constant noise levels we are already experiencing from work already in progress at the property.

We are unsure whether this work is subject to planning permission, but it is causing complaints from our occupants because the level of noise during office hours is creating problems with the smooth running of our organisation.

If planning permission is given, despite this, then we require noise and disturbance levels to be kept to a minimum and, in particular, at no point is there to be any work done which impedes or restricts access to our offices or driveway, which is in constant use.

Should you wish to discuss this further, please contact [REDACTED] or telephone him on [REDACTED]

Thank you.
