2015/3297/P	Chris Beech	246 Kilburn High Road	30/06/2015 15:07:12	NBJNOT	<p>FAO Zenab Haji-Ismail & Design Officer</p> <p>Dear Zenab,</p> <p>I note with interest the application for 308 Kilburn High Road.</p> <p>Whilst I have no objections to the application, I wonder whether it can be improved by having a brick facade, rather than plain render.</p> <p>I believe this historic photo shows why: https://www.flickr.com/photos/tetramesh/3307698144/sizes/l</p> <p>I would never have known that such beautiful brickwork was hidden away! It would be a terrible shame if a render finish on the new extension was to preclude the removal of the render on the existing building.</p> <p>Personally - if I had such power - I would ensure that the render was removed on the existing building and the new brick work was done to match. Indeed, all of the historic Kilburn High Road is brick.</p> <p>Architecturally it would be the correct thing to do and as such it would improve the perceived and actual value of the units.</p> <p>Best Regards,</p> <p>Chris</p> <p>246 Kilburn High Road; responsible for the (brick facade) development at 248 Kilburn High Road</p>
