Subject: Tree on 4 Langland (NW1, 336SP)

Dear Council Candem,

Mane is Ryder NW1, 336SP, I refer to development in Langland 6IP, witch stretch a cross the base of the both of my garden the fully in fact witch the development of the base at will have a very negative inducing affect on my garden and is value.

development as in include mine on garden in Langland who I am the free hold where I own tow of the flats the some value is between is around 4 and 5 millions, are people like us face to risk to my investment cause to this developments. The developers and the clients face risk to the owner capital but that is all, but the hope for benefit, I personally like others in my position face nothing but lost to my investment capital and my home, including the potential strontium plus the damage of my home.

Recently you wrote to me to inform me the three trees 8, 9, were my responsibility been in my land, I puzzled if this is my trees how can you give permission to cut them down, in the interest of the development there, thereby depriving my garden of folded by this trees. I do not mention the financial lost in value, by the proving the privacy this tree is fold. I make no mention of root policy witch Camden council I am wear and support. I have further comments.

This fact is very import this dangerous my on property.

sincerely
For and on behalf Darshbrief
