2015/3049/P	Jonathan Steele	8 Wren Street WC1X 0HA	03/07/2015 10:38:40	COMNOT	The excavation of a very deep extra basement and the insertion of concrete risks undermining the water-table and seriously affecting the adjacent three period listed terrace houses. Their foundations could be dislodged and undermined. Number 51 is itself listed and any planning application ought to be approved by English Heritage as well as Camden Council. The basement part of this planning application should be rejected.
2015/3049/P	Richenda Walford for BCAAC	HCA 61B Judd Street WC1H 9QT	09/07/2015 17:42:04	COMMNT	This is an unusual building and it is a shame that it is to receive a standard French-style mansard roof. Please ensure that the lift over-run is not visible from the street and also that no plant of any sort is placed, visibly on the roof. Also the design would be better if the mansard windows above the narrow windows were also narrow.
