2015/3447/P	S Bobasch	12a Keats Grove	15/07/2015 11:23:40	OBJEMPER	<p>I object to these changes.</p> <p>The reason for objection is on health grounds.</p> <p>I submit that the council has an over-riding responsibility to consider key health risks even above planning.</p> <p>These vents are only intended to discharge fumes and/or dog hair and/or other waste materials into the street.</p> <p>These materials, especially fine pet hair can be severely damaging to people who have even minor breathing or allergy problems.</p> <p>The harmful materials could affect people in the street and in the flat above when windows are open in summer.</p> <p>I request that this issue is referred to a relevant health and safety group for advice to avoid the council being liable for damage to health.</p> <p>If planning after such advice, is granted then I ask that the approval requires the use of filters to remove ALL the materials and fumes. That these filters are professionally maintained.</p> <p>And that this requirement is enforced properly at the expense of the occupier. - as it is conceivable that such an important requirement may not be actually implemented in full or kept fully operational.</p>

Thank you

2015/3447/P	Mary Ann Strathdene	Flat 17 Wentworth Mansions Keats Grove London NW3 2RL	15/07/2015 12:44:07	COMMNT	As a resident of Wentworth Mansions I live above the shops. I am worried about the noise of the dogs and also the air-conditioning and/or any air-filtration unit needed. This would have to be vented onto the pedestrians on the street as the internal light well is certainly not suitable. The light well is a very small area where our bedrooms are situated.
