A Plant Room suggests a lot of industrial machinery so I am concerned about the noise that could emanate through the louvres 24 hours a day, 7 days a week for heating, air conditioning etc. From that elevated height experience tells me that sound travels, and is amplified and will bounce back from the roofs of the terrace opposite so affecting the front as well as the back of my house + garden. Cannot the louvres be situated on the non-residential side of the service tower facing the railway line?

Please continue on extra sheets if you wish
