Your comments on the planning application

Finally after 43 years we have been considered for new windows! And spending a huge amount of money over the winter months on heating bills I am so happy to see that the council are finally doing something about it. However I would like to suggest a few things.

1. that all windows are replaced with some sort of PVC frame, as wood over the years will only become rotten again. as every time we open ours pieces of wood, putty fall... its a miracle how the are still up.
2. All windows should be double glazing, as wood/glass lets all the heating out. Plus noise has increased in the last few

### Planning Application Details

years ie, buses run on our street, and living above the front door, we are constantly disturbed with the residents entering and slamming front door.

I understand that the LOOK of the windows cannot be changed, but there are PVC double glazing windows on the market to have the same look as the one that are there now.

thank you and looking very much forward in this adventure.
