2015/3447/P	Dr Rodney Zasman	61 SouthEnd Road	21/07/2015 09:14:16	OBJ	<p>The proposed air vents are positioned right across the top of the shop front and at street level and will expel any untrappable hair and also skin dander. This means that anyone walking along the pavement will more than likely be showered with both. This can be fatal to asthmatics as dander is one of the triggers for asthma. It is also frankly quite unhygienic to have hot stale air mixed with hair and dander expelled onto the pavement.</p> <p>It's not ideal to have hair and dander swirling around the side walk into Pollys and neighbouring restaurants. No vent is that effective that it can trap all hair and dander.</p> <p>The type of vents are suitable for human medical facilities but not for grooming and if a lot of hair gets trapped in these vents then they will soon fail. I don't believe these alterations should be allowed</p>
