Dear Mr Gentet

I understand you are dealing with the above planning application.

I live in the adjoining property at 1a Maryon Mews and have been working with the bakery's owners to try to deal with noise disturbance to my property that arises from the operation of their bakery and the ventilation plant for which they seek planning permission. I don't wish to prevent the bakery from operating. But it is acknowledged by the bakery owners that there have been significant problems of noise, affecting my property in particular.

The bakery owners and I therefore jointly instructed an acoustic expert to look into the issues. He has today made a preliminary report but says in this that he wishes to undertake some follow-up investigations before making a final report. It is likely to be helpful to you to have his final report.

Could you therefore let me know the earliest date by which you expect to come to a decision, so that we can try to ensure the joint expert completes his final report in time for you to see it?

Kind regards

Gifford Laing
