Subject: [ENQ/APP - CA - FELL] Dangerous Tree - Conservation Area -

Address: 92 Priory Road. NW6 3NT

old mature ash tree in rear garden, approx 10 metres from house, 18 metres high, base diameter 1 metre, ridden with woodworm, big hole approx 5 metres from ground level which is large ants' nest, unstable and potential risk of falling.

Has been highlighted by a tree surgeon as a big risk.

Pics available on request.

Ants nest will also have to be dealt with first.

Can you please advise the next steps so that I can have all permits to take remedial action. Please also advise on pest control if this is something that Camden Council does.

Regards, David
