I object to the removal of this tree. It is not unhealthy and whilst it is possible pollard it from time to time to keep it healthy and within bounds, it is quite unnecessary to remove it. The application apparently does not consider pollarding the tree or removing a few branches, as an alternative to wholesale removal. For that reason alone the application must be defective and should be rejected. The large ancient trees in the gardens in Lambolle Road and Beslze Gardens are a key feature of the area, are essential to maintain the character and amenity of the area, and under no circumstances should be removed if they do not threaten the houses themselves. They obviously have to be kept under control, but that can easily be done without removing them altogether.
