

Sixteen beautiful sedum varieties for green roofs

SedumPlus is a pre-grown vegetation mat with an exceptional blend of sixteen varieties of sedum plants. Unlike many suppliers, our sedum is home-grown here in the UK – which means fewer road miles, less stress on your plants and delivery from field to your roof in the same day. **SedumPlus** – the natural choice.

Features and Benefits

- Contains UK native species
- Responsibly sourced materials
- Sustainably grown
- Drought tolerant
- Low maintenance
- 16 varieties of sedum
- Ready-to-lay mat
- Can be supplied and installed in the same day
- Minimal substrate required
- Minimal transportation means low carbon footprint
- Provides natural habitats
- Protects and extends life of roof membranes

Applications

- Zero falls roofs
- Lightweight roof structures
- Suitable for the majority of roof systems
- Sloping roofs
- Undulating structures

The sixteen varieties of sedum within **SedumPlus** bring with them great advantages. With an increasing demand for the use of native species in British developments, a wider variety of sedum will provide diversity and better adaptability to climatic and local conditions – giving you a lush, durable and more vibrant green roof.

SedumPlus 

SedumPlus is a low-maintenance, drought-resistant, 16 variety, ready-to-lay sedum vegetation mat. It is suitable for all extensive green roofs and can be laid on completely flat and sloping substrates without the need for permanent irrigation.
