Re: application: Flat a, 156 Goldhurst Terrace [ref 2015/2962 P]

Dear Sir/Madam

re our Swiss Cottage Conservation Area and Camden Planning –

I just saw a notice on the street that

Flat A, 156 Goldhurst Terrace [ref 2015/2962 P] [dated 10 July] are applying for a - new dropped kerb, - with front boundary, wall and hedge changes and other associated issues, to create a new parking space, where currently there is a nice garden, green, with the traditional format of wall and hedge and individual front garden much prized in this street and area..

I had thought this was no longer permitted? Preserving the walls hedges and front gardens that we do have here and are distinctive, as well as wonderful and enjoyed by us all, was important, I thought, and was preserved under a special *Section*, that was confirmed for this Conservation Area a few years ago when I attended several meetings. Having green gardens and limiting the off-street parking here makes a great, a marked, difference to our environment and to the look of the area for all who live here or pass through it. #

There is reasonable [if not perfect] parking in this part of the street with a local parking permit, including bays very close indeed to the front door of no.156 [on both sides of the street]

I would like to register my non-approval of this application.

Lynne Stern

there was a period when some houses got off-street parking [whilst useful for some, undeniably], but then regulations were re-looked at only a few years ago and tightened up, and I was sure that from then, it was not going to be increased.

Please let me know the situation and the outcome of this matter. Thank you.
