| 2015/2811/P     | Professor Stephen AR Scrivener | Flat 86 Russell Court  | 30/07/2015 08:08:49 | COMMNT     | <p>Removal of this local parking facility is likely to result in further noise and disturbance in the streets in the immediate vicinity of Russell Court owing to the fact that vehicles serving the locality are likely to seek parking in the streets nearby, so as to readily load and unload goods, etc.</p> <p>The application does not make it clear how the storage of hazardous materials will be policed or prevented. Coupled with this weakness, whilst the proposal speaks of an access alarm, clarification is required as to what other alarms systems will be installed that would be capable of dealing with the combustion, etc., of such materials, should they be covertly stored in the facility.</p> <p>Whilst I am not against change of use as a matter of principle, overall, in its present form the application lacks sufficient detail to be assured that the material conditions of residents will not be adversely affected by change of use.</p> |
| 2015/2811/P     | Susan and Nicholas Murray      | Flat 274 Russell Court Woburn Placd London WC1H 0NF                | 30/07/2015 07:25:21 | OBJ        | <p>We live in Russell Court which comprises over 500 flats. We object to this application. We are not satisfied that robust systems will be put in place for example regarding the precautions that must be taken to prevent the storage of all dangerous substances in the basement of our homes. There is nothing in the papers about fire risk assessments and fire prevention; there is nothing specific about how the facility will be safeguarded 24 hours a day in a densely populated area of London (hotels, residential and businesses); and there is no information about how access to essential services such as drainage, electricity, telecommunications and water will be safeguarded for the residents of the flats.</p>  |
