2015/3702/P	Justin Kowbel	2.6 Ziggurat 60-66 Saffron Hill London EC1N 8QX	29/07/2015 10:44:38	OBJEMPER	<p>I'm whole-heartedly for improvement and development by individuals/companies to improve and maintain their property at their discretion. However, as the Council is aware, the residents of the Ziggurat have had a difficult history with neighbours installing equipment that is noisy and takes away from our quality of life in our homes. The new roller shutter in front of the entrance of 87-89 Saffron Hill is another potential source. I would assume there are better options, such as a door at the base of the staircase, which is inline with other office building entrances in the area.</p> <p>I would assume that the installation of doors instead of shutters is more expensive. However, buildings in the area (including ours) maintain a high standard, which supports our areas property values/rental yields. It is therefore not unreasonable to expect quality be maintained.</p> <p>I therefore object to the installation. If the council grants approval to the applicant, I would therefore like to request the council to:</p> <ul style="list-style-type: none"> - restrict use (and therefore access) to 830am to 530pm during the week - confirm no use (and therefore no access) during the weekend - noise reduction measures on the installation of the equipment on both the motor and roller shutter guides <p>Thank you for your time</p>
