CLIENT	Library	Date	01/03/15	Scale	NTS
PROJECT	Typical Details	Ref			
DWG TITLE	Mesh Reinforcement At Opening.	Drawn	KJG	Checked	IC
		No	K-00-51		

Saint-Gobain Weber Limited

GB/Head Office: Dickens House, Enterprise Way, FLITWICK, Bedford MK45 5BY
Ireland: The Old Paper Mill, BALLYCLARE, Co. Antrim, NI BT39 9EB

Tel: + 44 (0)1525 718 877 Fax: +44 (0) 1525 718 988
Tel: + 44 (0)2893 343 700 Fax: +44 (0) 2893 323 232

weber.therm XM System comprising:
 -weber.therm insulant
 -6mm meshcloth coat
 (**weber.rend LAC** and **weber.mesh standard**)
 -weber PR310 primer
 -synthetic finish (plain or textured)
 (textured synthetic finish shown).

Insulant type & thickness
 to be as specified

Main wall fixings as appropriate for
 substrate.
 Drill & drive positive expansion fixings
 for masonry substrates.
 Screw fixings with restraining washer
 to panel areas.

NOTES:

Heavy duty meshcloth may be incorporated from
 base bead level to 2m up where additional impact
 resistance is required.

Where specified, main wall area fire fixings to be
 inserted through meshcloth coat at a rate of
 1/m².

Meshcloth patch to be applied over head of main
 wall fire fixing when applying 2nd pass of
weber.rend LAC.

Indicative line of
 substrate.
 Surface prepared
 as specified.

Tel: + 44 (0)1525 718 877 Fax: +44 (0) 1525 718 988
Tel: + 44 (0)2893 343 700 Fax: +44 (0) 2893 323 232

Insulant type & thickness to be as specified.

Indicative line of substrate. Surface prepared as specified.

Main wall fixings as appropriate for substrate.

Fire break fixings to be non fire reactive (including any washer).
 Fixings are inserted through the first strip of standard meshcloth which is bedded in **weber.rend LAC** and extends 100mm beyond the edges of the **MF** insulant.
 Meshcloth coat is applied over this strip and head of Fire Break fixings while the original **LAC** is still green to form a monolithic coat.

NOTES:
 Fire breaks to be provided at specified locations.
 Where specified, main wall fire fixings to be inserted through the meshcloth coat at the rate of 1/m².
weber.mesh standard patch applied over head of main wall fire fixings when applying 2nd pass of **weber.rend LAC**.

Weber EWI system as specified.
 Textured finish shown.

100mm wide (min) **weber.therm MFL** or **MFS** insulation of same thickness as main wall insulant.
 Fire break insulant bedded in **weber.rend LAC** to achieve smoke barrier.

weber.therm XM

Main wall fixings as appropriate for substrate.

Weber EWI system as specified.
Textured finish shown.

Insulant type & thickness to be as specified.

Existing flue.

Indicative line of substrate.
Surface prepared as specified.

Mastic seal in nominal 6x6mm check.

Mesh wing corner bead if specified.
Bead must be used with **weber.therm MFS** insulant.

NOTE:

Dimension X varies with flue type as follows:
Balanced natural draft flue - X = 600mm.
Balanced draft fan flue - X = 300mm.
(Information based on British Gas guidance)
