2015/2997/P	Bojana & Christian Reiner	12A Centre Heights 137 Finchley Road NW3 6JG	07/08/2015 08:51:35	NOBJ	Dear committee, As owners of flat 12A in centre Heights we have seen this building deteriorate over many years due to mismanagement. We find the new landlords proposal for extensions and refurbishment to be something that will be a great addition to the building and greatly enhance the living conditions for all residence of the building as well as improve the conditions of all neighbouring buildings. A refurbished and modified Centre Heights will be an uplift for Swiss Cottage in general and will help lift the appearance of the communal environment. We are all proud members of the Swiss Cottage community and this proposal will go a long way towards making our area an even better place to live in, as we greatly believe that what is pleasing to the eye is pleasing for the soul.
2015/2997/P	M.Jelali	27 Campden House Harben Road	03/08/2015 00:22:41	OBJ	I strongly oppose the planning application 2015/2997/P because of the followings: -It will significantly reduce the day time lighting to my flat -It will cause more congestion to already congested area in terms of number of residential buildings and flats and population -It will increase the demand for parking space in the area which already lacks enough parking space -It will affect the privacy to the rear of my flat where bedrooms are -It will increase the air and noise pollution in an already highly polluted and noisy area
2015/2997/P	M.Jelali	27 Campden House Harben Road NW6 4RN	03/08/2015 00:23:15	OBJ	
2015/2997/P	Pablo FACCHINEI	Flat 27 Centre Heights 137 Finchley Road London NW3 6JG	02/08/2015 09:40:30	COMMNT	I strongly OPPOSE granting planning permission for the erection of residential units/roofgradens on the current roof of the bulding as interfering with my legal property rights. I am the leaseholder and live in Flat 27 which lies beneath the roof. My only bathroom's SOLE source of natural light and air is a ROOF-WINDOW that is part of the original building design. My Lease states that the Landlord can interefere with the provision of light and air to my flat for the purposes of buidling but CLEARLY STATES that anhy structural damage caused must be made good by the Landlord. I reasonably take this to mean that they Landlord/applicant cannot permanently block my roof widnow without providing alternative means for natural ventilation and light to my bathroom. I have asked repeatedly and timely the Landord/applicant to explain how they will make good the loss of my skywindow resulting from building and they have FAILED to give any answer.
2015/2997/P	Marinos Diamantidis	Flat 27 Centre Heights 137 Finchley Road NW36JG	02/08/2015 09:49:25	COMMNT	I OPPOSE granting permission for the building of new residential units on top of the Centre Heights main building. I live in Flat 27 which lies underneath the roof and as a writer spend long hours working from home.The proposed works will certainky cause massive noise and dust and I have not been given any indication of how long the works will last. Already the preparatory works occuring (e.g. erection of scaffolding etc) is causing me great distress.
