

**Project – 9 Parkhill Rd**

**Extract from Specification**

**Author: CHC**

**Date: July 2015**

**Basement Excavation Method statement**

D20 -

53. The excavations to receive concrete should be clean, with no debris, tying wire clippings, fastenings or free water.

E10 –

60. During excavation all workings should be covered and protected from rain and should be kept free from water until foundations and below ground constructions are completed.

60.1 Any perched water encountered during excavation should be removed by use of small portable dirty water pump and discharged to surface water drains to the south of the site.
