2015/3936/P	A Klein	51A Hollycroft Avenue	11/08/2015 13:11:19	COMMEMP ER	<p>Kidderpore Avenue is already over-developed.</p> <p>Since the last major development a new primary school opened to help cater for the lack of available school places in the area.</p> <p>This year there were only 5 non sibling places for the new reception intake, which meant that families living as close as 200m from the school will not be able to send their children there.</p> <p>This is a local authority issue which the new proposed development will only exacerbate.</p> <p>There is a now or never opportunity to help the school expand which the local families desperately need.</p> <p>Moreover, there is no justification to deviate from the policy on development in designated open spaces for more housing.</p> <p>The proposed plans add a health and safety risk to the school children with the proposed exit from the underground parking being right by the school entrance.</p> <p>This is not to mention the inherent dangers during a lengthy construction period with all sorts of lorries and machinery operating next door to a primary school.</p> <p>Concern for the children's well-being also needs to be taken into account as there incredible noise will disturb their classes and ruin the playground activities.</p>
