2015/3753/P	J.M.A. Terpstra	27 Christchurch Hill London NW31LA	16/08/2015 17:39:13	SUPPEMAI L	Dear Sirs, I would like to expres my support for this proposed application. The alterations would greatly improve the usage space of the house, which also in view of the applicants having two young children would greatly improve their life and enjoyment. If we do not permit people to make alterations like the one proposed this will ultimately mean people with children will need to move out of the area.
2015/3753/P	Cyril Brown	Flat B 4 Lyndhurst Gardens	14/08/2015 14:40:09	SUPPRT	As a retired chartered surveyor Vidhur Mehra who is a former business associate has asked my informal views concerning the creation of a basement area at 36 Flask Walk. Having examined the plans the scheme is very modest indeed and should, with proper management cause minimal disturbance to his neighbours. The project manager to be appointed will be carte Blanche instructions to cooperate with both neighbours and the council so that the scheme can be executed expeditiously with minimal disturbance.
2015/3753/P	Ms Jenni Towler	1 PRIORY MANSIONS ENGLANDS LANE LONDON NW3 4TH	13/08/2015 14:05:26	COMMNT	I have no objection to this Basement Extension. I feel that basement extensions are in most cases preferable to adding another floor on top of a period building (often inappropriately) and spoiling the sky-line of Hampstead Village
