

22 Flask Walk
Hamstead
London, SE10

Planning App:
15/3753/P

18th August 2015

Dear Sir,

I wish to oppose the excavation of a basement at 36 Flask Walk for the following reasons:

1. There would be major disruption to residents & visitors for half a year at least.

2. There would inevitably be frequent closures or disruption to traffic when lorries and digging machines are operating. These closures would probably prevent residents being able to park their cars in Flask Walk due to uncertainty about freedom to regain access when needed. This would impact upon parking in other local streets.

SFO

3. New End School is regularly active & parents need to have continued access to deliver & collect their children, sometimes by car. The proposed works may well restrict this on Health & Safety grounds.

4. It would be setting a precedent for further basement installations in what is an important Conservation Area,
