Subject: Work at 109 Goldhurst Terrace , NW6 . Planning application 2015/4/4481 & 2015/4368

I am very concerned that work at 109 Goldhurst has already commenced before planning permission has been granted. I have received no notifications from the council nor seen any notices in the area. I believe planning has been submitted and is in the system but that works should not yet have started until everything has been reviewed .

The property is directly behind my house and an enormous scaffold is already in place with work in progression. The plans i believe are for an expansion of the roof, basement conversion and wrap around terrace.

I am concerned the roof will impact on light to my house and that any windows should not open or have clear glass as this will look directly into my bedroom.

The proposed terrace site is only 6 meters from my bedroom windows - i came out of the bathroom last week to find several builders in very close proximity of said bedroom and am very concerned about the lack of privacy i would have if this goes ahead. The terrace would also look directly onto my patio.

Whilst i understand that development should be considered , i would expect the owners to do this with the proper procedures in place and would be grateful if you can look into this urgently. I tried to contact you via the link on your site but this does not work.

Many Thanks in advance
