Dear Natalie,

**Re: Camden Lock Village, Hawley Wharf – MMA Application (Block A)**

We are writing with respect to the proposed change of cladding material; that is, the external fins of Block A from timber to terracotta.

We can confirm that the proposed change from timber cladding to terracotta cladding should have no material impact on the building's thermal performance, the proposed energy strategy and Building Regulations Part L2A assessment carried out on the Camden Lock Village (CLV) Block A.

As a result, the following s106 approved documents remain relevant and therefore do not require any changes or update:

	Document Name	Date	Reference
1.	Energy Efficiency and Renewable Energy Plan	19/12/2014	REP-2310296-5A-JRF-20141216-Energy Efficiency and Renewable Energy Plan-Rev B
2.	Sustainability Plan	12/12/2014	REP-2310297-5A-TA-20141212-Sustainability Plan-Rev A

If there are any queries please let us know.

Yours sincerely,

James Ford
