**COSHH ASSESSMENT SHEET
ACTION PLAN REQUIREMENTS****Part 2 of 2**

Are Handling Precautions described on Page 1 in place? If they are not being complied with, contact Senior Management
Briefly describe how controls will be maintained (outline arrangements and refer to other documentation where necessary)

Monitoring of Exposures:	Should not be necessary under normal working conditions.
How is information being relayed to the workforce and others who may be affected:	Induction training, general instructions with regards to the Safe Method of Work using this product in order to comply with Regulation 12 of The COSHH Regulations 2002.
Have written instructions been issued:	COSHH, Risk Assessments, Safe Method of Work Statements and safety information from the manufacturers/suppliers of this product.
Has necessary Training been given:	General Safety Awareness and product induction (Regulation 12, COSHH Regulations 2002).
Health Surveillance:	No statutory health monitoring required, but health records should note any problems.
Health Records:	To be maintained by Senior Management where necessary.
Other Controls:	None.

FIRST AID (In all cases of doubt or if symptoms persist, obtain medical attention).

Inhalation	Not applicable under normal working conditions.
Eye Contact	Wash out eyes with plenty of water. Obtain medical attention if soreness or redness persists.
Skin Contact	Wash skin with soap and water. If grease has been injected under the skin seek medical advice immediately.
Ingestion	Do not induce vomiting. Obtain medical attention.
Hygiene Arrangements	Good hygiene practices to be encouraged at all times. Washing facilities should be available nearby.
Fire Precautions	Combustion will generate smoke, possibly thick and choking, resulting in zero visibility. Extinguish using foam, dry chemical or carbon dioxide. Do not use water jet. This product may give rise to hazardous fumes in a fire. Wear self-contained breathing apparatus.
Storage	Storage temperature should be controlled to between 1 and 40oC.
Transport	No special requirements.
Spillage	Material can create slippery conditions underfoot. Transfer into suitable containers for recovery or disposal.
Waste Disposal	Incineration or landfill. Dispose of in accordance with all applicable local and national regulations.
