LONDON BOROUGH OF CAMDEN
Fast track & Validation Team Development Management

Dear Sir,

Further to my phone call on Friday 21 August 2015, I like to confirm my objection to the works proposed, ref above, to 1-26 Waterhouse Close, London NW3 5PF:

1) Remove mature Lyeland Cypress

This tree just needs a little trimming to one side as done before. it is a nesting home to a lot of garden birds especially in winter as it is an evergreen tree, giving a lot of pleasure to a lot (25) of users of the garden.

Please bring in mind we are still in the main breeding season for nesting birds and it is in a Conservatin Area. A little trimming that's all that is needed.

2) Remove Cherry tree. This was planted by CAMDEN as part of an Orchard "Tutti Frutty Orchard" in 2010, and there is nothing wrong with it. It is bearing fruit every year to the delight of (25) users. It is also used by the garden birds for nesting. Other comments as above. Please leave alone. it is doing no harm to anybody, just some fruit! Thank you.
