2015/3100/P	Viviana Fain-Binda	Flat 6, 89 Priory Road NW6 3NL	26/08/2015 19:39:17	OBJ	<p>We oppose the new Revised Plans created on Camden Planning Site Reference 2015/3100/P on 21-08-2015 because they still do not address important problems which were raised by us in our previous objection.</p> <p>At 5.5. metres, the extension is too long, intruding substantially into the geography and character of the communal garden, blocking out light to neighbouring property. Its size is also out of balance with the aesthetic of the rear of this Victorian house. This is a Conservation Area and the design of this extension does not take into account this very important fact.</p> <p>The design features of the extension clash with the Victorian architecture of the house instead of blending into it. It uses windows which are overly large and are also made of aluminium. Both of these aspects of the design are not in keeping with the date of the building and do not acknowledge this Conservation Area whose “character and appearance is desirable to preserve or enhance” as mentioned in the 1990 Planning Act.</p>
