2015/3039/P	Miss Jarrett	10 Loveridge Mews	28/08/2015 15:15:09	OBJNOT	<p>There is a SEVERE problem with rats that the council refuses to address despite regular communication from various existing Mews residents. The impact of an additional level to 4-5 Loveridge Mews will increase the number of residents in a small area, thus impacting on the refuse issue and therefore the vermin problem which the council is yet to address</p> <p>Increased issues with refuse that, again, the council refuses to act upon, despite numerous communication regarding other residents leaving their refuse only hours after refuse collection. More dwellings leading to greater problems in refuse being left in the street leading to increased problems with vermin.</p> <p>General increase in noise levels through increased number of residents and dwellings in the Mews</p> <p>An additional level to 4-5 loveridge mews will severely impact on traffic / vehicles down the Mews along with reduced ability to park safely on the Mews</p> <p>Increase in noise levels whilst building works taking place; likely to be severe disruption to parking</p> <p>Concerned with regards to the impact on the loss of light on property as there are plans to build upwards. An increase in height of 4-5 Loveridge mews will restrict the light.</p> <p>Concerned regarding decrease in privacy - an additional level will lead to two lots of flats overlooking bedrooms in 10 Loveridge Mews.</p>
