Good morning - regarding the above Planning Application ref to put three more air conditioning units on the roof of Maple House, 149 Tottenham Court Road, London W1T 7BN. I live at Flat 49, 30 Grafton Way, London WC1E 6DX - the same building, but the flats are around the side and back of the building, the address being 30-40 Grafton Way, London WC1E 6DX. Our TV aerial is situated on the roof of the 4th floor level of the building and ever since people have been up on the roof, to check things out I assume, our television reception has been diabolical and is driving everybody mad (it may have been knocked or moved). This started on 7th August and since then it has been impossible to get proper reception for the TV. It would be very, very much appreciated if you could send somebody appropriate up to the roof to check that the aerial is as it should be, and if not to please adjust. It's been almost a month now and enough is enough.

Many thanks, in anticipation of your quick response.
Regards
Patricia Davis
