Dear mr Gracie

I live in the first floor flat of 37 Lyncroft Gardens. I send in a postal objection to these applications in July but have checked the progress on-line tonight and cannot see that they have registered.

I strongly object to these applications as they will have a significant impact on my property and those of my neighbours. They will cause blocking of light and privacy to our properties. There will also be considerable disruption during the works. As I work from home and my office is at the rear of my property I am concerned that there will be impact on the light coming into my property also it will mean the privacy of the two back rooms in our property including the main bedroom will be compromised.

Please can you ensure that my objections are adequately noted

Kind regards

James Poletyllo
