2015/4710/P	Jennifer Mathews	10 Honeybourne Road London NW6 1JJ	12/09/2015 20:42:05	INT	We live in a house across the street. Parking on this street is extremely difficult. There are around 180 flats on our block, and most of the street space is taken by on-street resident parking. The few areas with single-lines are across the drives of the handful of houses near the end of the street, of which ours is one. This results in our drives, particularly ours, being blocked several times per day. Often our drive is blocked by builders, decorators, electricians, plumbers et al, working on renovating the flats - and not for loading and unloading, but for their convenience. We have been blocked for lengths of time, sworn at, etc. It is very unpleasant and happens on a regular basis. Please, in the planning stage of this application, we URGE you to require as a condition some sort of provision for vehicle parking, such as requiring suspension of residents bays or some kind of commitment, to accommodate the parking requirements of the builders on this project.
