Re planning application 2015/5149/T. Fleet house, Admiral's Walk, NW3

We are writing to express our concern about the above planning application to partially remove the foliage from three trees protected by TPOs in order to facilitate the demolition/construction of the above property.

It is not entirely clear from the application where these trees are sited, but if they are the trees covered by TPOs in the footpath behind the raised kerb which runs along the lower boundary wall of Fenton House, I think you should note that Camden has already withheld permission to use this ancient right-of-way as an access site for construction vehicles during the duration of the work. If these are the trees in question, then we wish to strongly object to their being 'crowned' and we would welcome your acknowledgement that note has been taken of our objection.

Yours sincerely,

Dr Christine and Mr Damian Pullen,
2 Lower Terrace, NW3 6RG

P.S. We are out of London for the next few weeks, so please could you send any communication relating to the above by email.
