

Tree Work Specifications
for
10 Downshire Hill
Hampstead
London
NW3 1NR

Front Garden

1 Large old Magnolia - *This tree is in decline*

Thin throughout the crown by 10%
Remove all deadwood from the crown
Reduce extremities of low branches over shrub beds

1 Wisteria -

growing on the front of property
This plant has recently been reduced and requires no further action at present

Rear garden

1 Large Ash -

This tree is situated in the neighbours rear garden

Remove the large, dead branch growing in the crown of the main stem which has a potential to fall into the rear garden of No.10

On the secondary stem, which grows to the east and at an angle of 60°, there is some bark damage on a large branch, possibly caused by a rubbing branch. This branch will die and fail in the future

Reduce the large, leaning stem, growing to the east and over the rear garden of No.10, by 33%

Remove any deadwood from the leaning stem
