2015/4891/P	Nancy Mayo	Redington Frogna Association Secretary	27/09/2015 17:20:47	OBJ	<p>Redington Frogna Association is extremely disappointed not only by the derisory amount of soft landscape, but also by the proposed planting plan. We propose that the planting scheme for this important plot, which had previously provided bat foraging habitat for pipistrelle and soprano bats, be agreed with Camden's Nature Conservation Officer.</p> <p>We suggest that the following native species should be included in any hedgerow mix: native British yew, hawthorn, wild privet and hazel. A pond would also be beneficial in helping to encourage the return of the (now displaced) bats, in line with the emerging Neighbourhood Plan for the Redington Frogna area.</p> <p>Similarly, new trees to be planted should include insect-friendly species, such as oak, silver birch and alder.</p> <p>We request that this unsatisfactory soft landscaping plan proposed be rejected.</p>
