2015/4979/P	roxane vacca	61 Judd Street	24/09/2015 11:20:45	COMMEMP ER	I am absolutely horrifies by this application and horrified that permission has been given for a smoking area. I was not aware that an application had been made. I live at 61 Judd Street and the Generator is the bane of my life. I have already complained to the council about the 24 hour noise from the Generator. I am unable to open any windows anywhere in the house either day or night because of the endless racket caused by this building. I cannot oppose this more vigorously and would like to arrange a meeting in person. This will entail people on my doorstep smoking and being noisy for 24 hours a day. I already have to put up with enough fro this building including rubbish and used condoms been thrown onto my deck. this cannot be allowed.
2015/4979/P	frank gilks	Flat 1 15 Leigh Street	27/09/2015 16:09:26	OBJ	A licence to use this external smoking area throughout the night is an unnecessary nuisance to neighbours. It will be difficult to control, and inevitably result in additional noise and harm to the amenity of residents on leigh street. I live directly behind, at number 15, and can hear people at night with windows open - the addition of an external smoking area is ill conceived and should not be permitted. Prioritising 24 hour smoking for guests, over a decent nights sleep for long establish residents would be unfair.
2015/4979/P	Emma Rickett	Flat 21 39 Tavistock place Bloomsbury London	25/09/2015 11:37:27	COMMNT	Very much in favor of this to ensure that noise in Compton Place is kept to a minimum. Without this extension, smokers would remain in Compton Place and wake those in surrounding blocks.
