2015/4936/P	Alastair Chorlton	JW3 341-351 Finchley Road London NW3 6ET	01/10/2015 09:34:34	COMMNT	The plans show the Residential Block owned by JW3, but do not appear to refer to our main Building, 341-351 Finchley road. within this Building we have a children's nursery including an outdoor play area which appears to be likely affected by this Mast
2015/4936/P	veronica and Keith Hollender	4 Alvanley Gardens London NW6 1JD	29/09/2015 16:06:35	OBJ	The Application is "dressed up" as being of environmental value. In fact the installation of the mast is purely for commercial purposes to enable remote reading of smart water meters. The installation of the mast will enable Thames Water to cover an area of roughly 6 times what is currently possible, over a large area of London. Local residents are being asked to bear the effects that such an installation will have. We note that the Application makes no mention of the fact that the Mast will be immediately above the nursery facility at the adjacent JW3 building. This facility, for children from baby to age 4 has a nursery terrace possibly within the radiation area of the Mast and these children are on the Nursery Terrace for periods of up to 30 minutes at a time. We trust that Camden has carried out due diligence on the possible effects of this exposure.
