

01. Concept Study - External perspective

6.0 Finishes

Detail of finishes & fittings

As well as the entrance doors along Shelton Street, Crittall has been specified throughout the internal finishes for the 65-75 Monmouth Street.

The refurbished lobbies, stair cores and offices contain internal Crittall windows and partitions, with black oxidised steel handrails, doors and ironmongery.

The proposed Crittall additions to both the Upper St Martins Lane elevation and Shelton Street elevation would provide a level of consistency between the internal and external finishes.

02. Crittall - Examples
