

Cross Section

Existing Cross Section

Proposed Cross Section

The steel staircase will be removed taking careful consideration of all floors and timber flooring whilst removing. Props should be used where necessary to support the floors when taking out the stairs.

New Stair case to go in the void left by the steel staircase will be constructed back using timber floor joists that match existing including floor boards.
Fit new front door to access residential area and the door is to match existing door if this is possible.

A new stair case opening is to be made to the rear of the ground floor restaurant for access to the basement kitchen and w/c areas.

Scale 1:50
