*Your comments on the planning application*

I own a unit in the Bruges Place complex immediately behind the proposed new construction.

I have read all the technical and design reports but nevertheless have some objections:

1. The proposed design is completely contrary to the style of the adjoining traditional shops along Royal College Street. No use of London yellow stock bricks as seen all over this area of Camden.

2. The completed height with the enormous sombre and aggressive chimney dominating the site , is far too 'industrial' for the neighborhood. I would liken this to a crematorium smoke stack , not helped by the overall style of the roof finishing.

3. My apartment terrace and windows face the proposed building - I would like to see the height reduced to match the existing row of houses.
