To whom it may concern:

Re: [REDACTED]

I am writing as [REDACTED] General Medical Practitioner to express concern about the proposed conversion of the space below his flat into a pet grooming parlour.

As you have been informed, [REDACTED] has severe and very brittle asthma and allergic rhinitis and has only just recently got his asthma under control with the use of various inhalers and nasal steroid preparations.

My concern is that the presence of animal hair and dander will adversely affect him and it is likely to provoke his allergies, as he is known to have a strong allergic element to his asthma and rhinitis. In the past he has had some life-threatening exacerbations of his asthma which can come on very rapidly.

I think these factors need to be taken into account in any planning permission granted to the firm which is proposing to start this business.

Many thanks for your consideration.

Yours sincerely

[REDACTED]

Dr Jonathan Sheldon MRCGP
GP Principal
