Attn: Mrs Moran

Dear Madam

**Re: Planning Ref 2015/4774 – Camden Lock Market**

We are writing in respect of the above planning application.

As the operator for many years of Dingwalls, the live music, entertainment and bar venue that forms a key part of the heritage of Camden Market, iNTERNAIN place great value on the culture and history of this unique part of London. Any change therefore in our view, must seek to cherish and preserve these values whilst making improvements relevant to contemporary demands and respecting the character of the Conservation Area and its buildings.

We have studied the planning application and are of the opinion that the proposal is consistent with the stated objectives of the Applicant, these being to:

- Enhance the character of the existing Market
- Rediscover the Market's Arts and Craft background
- Improve and enhance the public realm by improved permeability and legibility
- Create new accessible routes through the Market
- Reveal the hidden heritage of the site
- Create high quality buildings that complement the existing use and character
- Make connections to the surrounding markets
- Improve facilities for traders and visitors
- Enhance safety and security around the site

So long as the changes outlined in this application enhance the area whilst preserving the culture, heritage and character, we are supportive in principle, of the proposed works.

Yours faithfully

*John Leslie*
