

Application No:	Consultees Name:	Consultees Addr:	Received:	Comment:	Response:
2015/4993/P	Carly Herman	8a Iverson Road	11/10/2015 16:41:23	COMMNT	There is already a lot of noise in the evenings for the houses close to Brondes Age. A roof terrace would make the noise unbearable and too intrusive for residents
2015/4993/P	Jeremy Moorshead	8 Iverson Road	10/10/2015 13:34:37	OBJEMPER	I object to this application on the grounds that there will be added noise affecting the residents of Iverson road behind BrondesAge. It is unfair that we residents should have to suffer this inconvenience for the sake of added commercial gain for an already very busy bar.
2015/4993/P	Reena Patel	8 Iverson Road London NW6 2HE	11/10/2015 03:24:42	OBJ	The public house is adjacent to a residential street (Iverson Road) and a roof terrace bar would create significant noise and disturbance to residential homes in and around the area and therefore we strongly object to this proposal and suggest that you reject it.
2015/4993/P	Alan graham	8 Overdone road Nw6 2he	10/10/2015 13:43:51	COMMNT	I object strongly. Brondesage already is too noisy and raucous. A terrace as described will add negatively to an already unsatisfactory situation. Definitely not please
2015/4993/P	Agnes	7 iverson Road	10/10/2015 14:08:36	OBJNOT	<p>I strongly objet to this planning application on the following grounds:</p> <ol style="list-style-type: none"> 1. Kilburn high Road and thus the beginning of Iverson road is already plagued by week-end nuisance from drunks and general anit-social behaviour due to the already large drinking establishments. Increasing the size of an historically busy establishment will increase this problem, especially in the side streets where people tend to congregate and have their arguments. 2. Noise coming out of the open terrace is already very high and adding an other open space will create additional noise. Any increase in surface (although is not wished for) should be enclosed in a fully sound proof arrangement. This venue plays loud music which the sound assessment did not account for. <p>In brief kilburn does not need any further source of disturbance.</p>
