Published 1873 - 1874

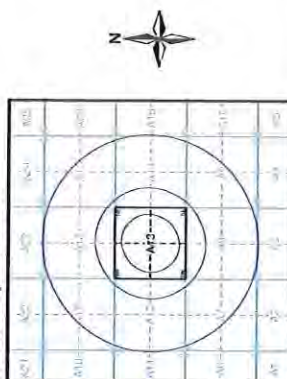

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale appropriate for England, Wales and Scotland in the 1840's. In 1854 when the 1:250,000 scale was adopted for mapping urban areas, these maps were used as the basis for updating the 1:10,560 map. By 1938, all OS maps had been updated to the 1:10,560 scale. The maps produced since that time are based on the Cassini Projection, with independent surveys of sample points across the country or county, giving rise to significant inaccuracies in scaling errors. In the late 1940's, a Provisional Edition was introduced, which updated the 1:10,560 mapping from a number of sources. The maps appear unrecognisable from those of the previous editions, with many of the details being unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first edition of the 1:10,560 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

London Published 1896 Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent inaccuracies in outlying areas. In 1940, the first edition of the 1:10,560 maps was produced, which updated the 1:10,560 mapping from a number of other sources. These maps were initially overlaid with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Historical Aerial Photography Published 1950

Source map scale - 1:10,560

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from Air Force photography. They were produced between 1944 and 1951 as an interim measure, pending preparation of conventional mapping, due to post war resource shortages. New security measures in the 1950's meant that every photograph was re-checked for potentially unsafe information with security sites replaced by lake images or clouds. The original editions were withdrawn and only later made available. A period of fifty years although due to the accuracy of the editing, without a period of fifty years it is not easy to spot the edits. Where available Landmark have included both revisions.
