2015/5514/P	Mr Hamo Yedgarian	58 Levita House Chalton Street London N1 1JJ	29/10/2015 16:26:40	COMMNT	I oppose this application as I am concerned at the proposal of this project as I can't see where this docking station is going to be fitted along the pavement in front of Levita House on Ossulston Street. The pavement is just big enough for 2 pedestrians to walk by each other, especially for a big docking station like the proposed one. This is going to narrow the pavement for pedestrians. Also, there are wheelchair users and children who use the pavement everyday and this will restrict their movement and possibly becoming a Health and Safety hazard. Therefore, I do not think this is a good idea and Camden Council will need to identify a different place for this docking station.
2015/5514/P	Mr Nabil Fattal	38 Levita House Chalton Street London NW1 1JJ	29/10/2015 15:02:58	OBJ	I oppose this application as it will increase youth criminality in the area. There is an existing problem with youth criminality which Camden Council fails to address adequately. Young people in their bicycles have been targeting parked cars and motorcycles parked outside the British Library. This project will increase the stealing of bicycles and will make the area more unsafe of us, the residents.
