2015/5583/P	Richard Lucas	Basement 184 Camden Road London NW1 9HG	30/10/2015 22:57:36	COMMNT	I live in the basement of the property that backs directly onto 35 Camden Mews. What little sun light that makes its way into my home would be significantly reduced if the proposed extension to 35 Camden Mews is given the go ahead. During the months September to April (inclusive) the sun moves in an arc throughout the day that just barely clears the existing roof line of 35 Camden Mews. The proposed extension would cast us into a shadow for eight months of the year. I am certain that you would agree that this would be entirely unacceptable.
