Initial	
Last Name	McMillin
Organisation	Flat 53
Comment Type	Object
Postcode	WC1N 1HD
Address line 1	Flat 53Witley CourtCoram Street
Address line 2	LONDON
Address line 3	+442072782018
Postcode	WC1N 1HD

Your comments on the planning application

By pure chance we found out that the application was submitted for a docking station in the Coram street, in front of our house Witley Court .

We strongly object to it on the following grounds:

1. It will substantially increase the level of noise in the street, including the night time, affecting the quality of life of the residents in the lower floor flats.
2. Coram Street has two-way traffic and is very busy. With bicycles going in and out the congestion will be even stronger.
3. There are several disabled residents in the block and we

Planning Application Details

have only one parking space for the disabled which is already a serious problem. The reduction in parking spaces will negatively affect their life and possibility of movement.

4. Many of us fully depend of food and good deliveries as well as the taxis for our movement. The absence of parking space will make these services less convenient and more complicated for us.

5. There has not been a process of consultation with residents on this planning suggestion. The residents were not informed (we found it out by pure chance), nobody came to discuss it with us or ask for our opinion on the matter. We would question the legality of this process.

6. It is unprecedented in central London to build such a station in front of a residential house. There are many spaces in our area where it could be installed without any disturbance for the residents: around our local park Russell Square; Thornhaugh Street off Russell Square, leading to SOAS would be an ideal area, mostly closed to cars but accessible by bikes - to name but two.

The idea of building it in Coram Street in front of Witley Court is badly thought through and the whole process has not been followed properly. We hope that Camden planning committee will re-consider, and find a more suitable place to build such a docking station.
