2015/5898/P	Noel McLeod (Mrs)	48 Witley Court Coram Street London WC1N 1HD	03/11/2015 17:52:13	COMMNT	I strongly approve of the principles behind the bicycle stations and, in principle, have no objection to the installation of one outside Witley Court. In fact it could bring a health benefit to our residents living in basement flats with a window(s) onto Coram Street, as the fumes engendered by the current parking spaces would be removed. My reservations are related only to the space envisaged for disabled parking and access for ambulances and deliveries (all of which are common here as we have many elderly residents). I've noticed that many of the docking stations hold fewer than 30 cycles so I would like to request that the access space to our main door and the adjoining shops is increased a little by the installation of a lower number of cycles than planned.
