My enquiry is

Re: Application No: 2015/5286/P

The site plans and associated documents are inadequate . For example, on the document titled "Location Plan" what are the green rings meant to represent? Existing trees or new trees?

We don't need any new trees in the area. They cause mess and block light. Please advise where I can find out what these green rings on the submitted plans are supposed to represent.

Thank you
